Residents In Public School Area Petitioning Board Of **Education To Prohibit Use** Of School Grounds.

Board of education at its meeting last night was called upon to deal wi" \_ petition from residents of the Murray street - Livingston avenue area urging that use of the public school grounds be prohibited for Sunday baseball games.

While baseball has been played on the school grounds on several Sundays during the summer, feeling is said to be particularly strong against a game said to have been staged there between teams from Grimsby and Beamsville last Sunday a ternoon.

Residents of the vicinity claim that the game was largely attended and that the cheering of the fane disturbed the usual peace and quiet of Sunday afternoon. Representations, it is ederstood, may also be made to town officials as there is considerable feeling throughout the community that Sunday games should not be permitted.

What action the Board took on the matter will appear in the renext week's paper.

A Grimsby lady, Mrs. Emma Clarke, 26 Fairview avenue, had an experience last week, that while thrilling, is not one that she wishes to go through again.

Mrs. Clarke was in Cornwall rethe purpose of attending the graduation of her niece Miss Florence James, a former Grimsby resident, as a nurse at the Cornwall hospital. The graduation exercises were to take place on Wednesday evening, Sept. 6th, in the High School Auditorium, but on Monday night the earth tremors came and all plans were knocked awry. The ings were badly damaged including the hospital.

The terrifying grumbling and roaring in the earth awakened the residents and buildings and portions of buildings were crashing all around them. There were no casualties, but Mrs. Clarke has no desire to go through this experience a second time.

GOVERNMENT AND NEWSPAPERS

"Were it left to me to decide whethor we should have a government witho. newspapers, or newspapers without a government, I should not hesitate a moment to prefer the latter." -Thomas Jefferson.

A COMPARISON

Newspaper men, even on vacation, generally find a chore or two which med doing. Don Iadon, the New York corre ndent of The London Daily Mail, went on vacation back home to England, and in the British capital he saw the devastation of the robot bombs and looked upon the general war spirit of the people. But there was also a question, and here it it:

"How does Britain at war strike you as compared with America at war?" and here is Mr. Iddon's answer:

"There is no comparison. The American civilians-all of them, not just those with big bankrolls-are living a life hardly distinguishable from peacetime existence. There are mountains of food and acres of clothing for everyone. There are plenty of luxuries. More money is being made by the entertainment, catering and clothing industries than ever before. The war is remote. Lationing is the merest pinprick."

Canadians visiting the United States will subscribe to the truth of the foregoing in full. It remained, in the first few months of the war for the late Senator Borah to describe it as "phony." Could that not be applied to the home front, not ..., in the United States but in Canada, today, that it is a phoney war as far as interference in the way of life of the average person is concerned, and compared to European standards. Rationing in Canada, what there is of it, is hardly a pin-prick. Meat is unlimited and that does not apply to the United States.

Sugar, tea, coffee, and butter are not too scanty to hurt anyone, and soon there will be no restrictions on the beverages. As far as rationing goes, there has been more holler made about beer and whiskey shortage than anything else, probably for the reason that such shortages complained of are arbitrary.

It is true that the cost of living is up from 1939, but so is employment and the wage scale ; enerally. But above all, a bomb has yet to fall on Canada or the United States.

THE REAL REASON

The cause of the turnover in the recent Quebec elections are many and varied, according to many people and papers: The sins of the King Government; the anti-British feeling; the desire one Quebec people to form a nation of their own, as well as many similar and variet reasons.

We have come to the conclusion that they were all wrong. And it was easy to reach that conclusion after a study of the Quebec Election Act. In this election, for the first time, the women of that Province were given the vote. They had struggled long and hard for it, and all the world thought they would be grateful for the franchise.

But were they? Not at all! On the contrary, by all accounts they were wild with indignnation and made to blush to the roots of their crowning giory. And all on account of the Election Act, which lays down the law that the age of every elector must appear on the voters' lists opposite the name of the

Can you imagine any woman voting for voter. any government which enacted such a law! If you were a woman, would you stand for having a secret you had spent years of your life protecting, emblazoned before the world in bold type, on trees and telephone poles and public buildings, where voters' lists are diplayed at election time? You wouldn't.

Neither d the women of Quebec. That is the real rean for the defeat of the Godbout Governmet. Mr. Duplessis is a mo. courtly French entleman, and we doubt if he will make av unpardonable mistake like that when healls an election.

In other words, some of the shysters who think they are getting away with something are going to get a very big surprise.

Government machinery maybe cumbersome. It may be slow. But were are very many ways of tracking down thetax chiseler.

With certain kinds of people the "double cash system" is currently very popular. Under that system you put a little f the incoming cash in the till; most of it in your pocket.

The Canadian people generally have a high contempt for this kind of fraud. They will demand sharp and sur retribution indeed for the offenders.

Nothing less than the most sedulous and most efficient system for hunting out and punishing shysters will be acceptable. Every citizen has a duty to himself and to the nation to report such activities.

#### "GETTING THE NEWS"

(By Phil Osifer, in Seaforth Expositor)

I was in the newspaper office in the village the other day. Mrs. Phil had suggested we send the newspaper to our hired man who is in England now. He was born and raised in these parts and for that reason has always been interested in local doings. In fact there was only one thing ne liked better than eating and that was talking about what the neighbours were doing.

Ed. Jarvis is running the newspaper now since the regular fellow joined the army. I've known Ed. for years. He used to be on a city paper, retired from that and then took over when he was needed. He's always at me to tell him what's going on around our township. I never seem to be able to think of anything but he persists in asking for something to write about.

When I went in this time he said, "Got any news for the paper this week, Phil?" There just wasn't anything to tell him. Things had all been quiet on our Concession for weeks. He kind of laughed when I told him, asked me to have a chair beside the old box stove, and he sat down for a chat.

The conversation drifted along about things in the village and then we started talking about our township. I told him how Ed. Higgins has a notion to run for councillor and of how the Big Swede on the Ninth Concession plans on dropping out because of the extra work on his farm since his boy joined the Navy. Ed. seemed surprised to hear this. I noticed that he was fiddling around with a piece of paper and a pencil but didn't pay any attention to it.

He really enjoyed the story about Jum Pennypacker, the old character on the Second Concession. Jum, as we all call him, grew his own tobacco this year. He mixed it up with some molasses and other junk, which he heard would cure it and then st. ffed it in a hole he bored in a tree. Now that may be the way to cure tobacco, but Jum messed something up. When he smoked his first pipeful of the stuff it knocked him out and his old housekeeper had to call the doctor to revive him. Folks on his concession are talking about writing to the government and telling them that the old fellow has discovered a new poison gas.

I was quite surprised when Ed. told me that he hadn't heard about old Mrs. Bruce breaking her leg. She's over eighty, keeps three cows and some chickens and has been as spr. as ever up until the time she slipped on the ice and broke her leg. She was out in the cold for over two hours. The mailman noticed her and went in to hilp her. The neighbors have all been taking turns helping her out.

When we got through Ed. just sort of grinned and said, "I want you to pay particular attention to the paper nextweek. Read it up and let me know what you think." aid, and well, sir, you could have knocked me over with a feather! There was all the material I had been talking about . . the whole thing . . . about the council andJum rad Mrs. Bruce. You know, it made kid of interesting reading.

I guess when Ed. asks me'll know what he means after this when he ants news.

#### TAKE A TIP

1. To plant alips of geraniums, etc., put some lumps of charcent in the pot-wood ash charcoal keeps the earth sweet

2. For potted plauts on the window-sill, use glass gliders that you buy for furniture. They are convenient to use on a narrow ledge. 3. Always water plants with a little warm water-preferably at

night, 4. Do not forget to pot some paraley. It grows easily and supplies a summer green for winter salads.

# 'CAMMYS' MAIL BAG

Dear Carm:

ses and send very kind regards Hello Carm:- here I am once t all members of your committee. again writing you a few lines of thanks for another parcel of cigarettes which I received today, also your postcard.

I am sorry to hear that you haven't had any cards of thanks for your previous cigarettes as I always write but we have been informed that a lot of mail is going astray due to Italians who are rob- depleted. bing our mail trains, besides the boats that are going down.

Well I guess that here, you have been looking at too many posters as we have been having prisoners which none of us enjoyed lots of rain in fact I can honestly looking after very much now we say that all the time I have been have mostly English and Canover here we have had about six months of good weather and hot.

Well once again thanks for the So life is never monotonous. cigarettes. Cheerio, hoping to see you soon.

Gratefully yours, Ken Warner.

Dear Sir:

Just a line of appreciation for the 300 Winchester cigarettes I received today mailed on June 8th. Being the first cigarettes I've received in France they were more than welcome, your "smokes' fund is a great tribute to the boys from Grimsby.

I've just been in Normandy ten days today, and, with the state of affairs a soldier really appreciates the parcels from home, as you just can't go out and buy what you need, (yet anyway).

Well I haven't much more to say, except the rest of the Crimsby boys here are O.K. (that is, Unit). The weather has been swell, no rain and the roads are covered with two inches of dust from the heavy traffic, its quite a change from being in England nearly 4 years. One thing certain, there's never a dull moment here. I hope the next cigarette gift from you finds this Unit in Paris at least.

Well this is all for now and thanks a million again for the regular shipment of cigarettes. Sincerely yours,

Pte. J. Jones.

Dear Mr. Millyard: Once again I have the pleasure of writing to thank you and the Grimsby Chamber of Commerce fo. the Sweet Caporals which I received yesterday. They arrived in good condition, and were more than welcome. It's grand to know the people back home still think of us. I met Ken Warner and Bill Rooker recently. I'm sure their people would like to know they are looking fine and fit. Tun told me there were a lot of Grimsby boys in this area, so I may run across some of them soon. Its great to meet some one from the old home town and have a chat. The weather here is warm. I miss the good old winter time in Canada.

I wouldn't trade a square foot of Canada for the whole of this bloody country. Rome was the only decent place I have seen here. I hope it will be over soon and we can get back home to normal life

Sincerely, Nelson Copeland.

I received 300 cigarettes Tom you a fort nite ago and today another 300 reached me in France, so I am sending thanks for both lots. They are greatly appreciated. I assure you and even the English chaps whom I fly with will say a good Canadian cigarette can't be beaten.

I have been over in Normandy just two weeks now and after getting accustomed to my new surroundings fine it quite pleasant. During that it is eve had to move three times which is a proper nuisance but I 'hink we've become settled for aw. now. We've had some real : any days lately but are fortunately only a few miles fron the sea, so a nice swim in the salt water is very efreshing. The dust around here is very bad, so a good rain comes in handy occasion-

ally to keep the dust down. Our food is pretty good consider ang, so I haven't many complaints

to offer. . When we first came over the Germans were only about 10 miles away, but after our recent advances a good many miles now lie between us and the enemy.

Only a hundred yards . way from where I am there is a Canadian cemetery where the white crosses with the little maple leaves stand row on row in memory of our glorious heroes who fought and died here. The cemetery is very well taken care of and a little flower crowns each grave. There are quite a few of the Hamilton Light Infantry buried here but I couldn't recollect any of the names.

I have been able to get up to the front lines a couple times where there's bags of excitement and it really proved very interesting.

Again I thank you for the cigar-

Yours very sincerely, P.O. Ivan Smith.

At one time we had 450 German adians with some New Zealand, Moroccans and Russians thrown in.

Dear Friends:

I received the cigarettes you so thoughtfully sent me and wish to express my very sincere appreciation for your kindness. I can't begin to start thanking you for the smokes because smoking is one of

ir greatest luxuries and the word "thanks" in this care doesn't seem to express my gratitude. Still I can't think of a better word to use.

I guess Canada is looking great at this time of the year. would like to be back there once again and I expect to be in the very near future.

I very sincerely hope all you people of Grimsby are enjoying mushrooms. In a case of necessity the very best of health.

Before closing I would once again like to thank you for the cigarettes. I remain,
